MEMORANDUM FOR THE RECORD

SUBJECT: Studies for the OMB Preview (U)

1. The OMB Spring Preview is tentatively set for 3 June, and it will consider the following areas:

- Human Source Collection,
- Production,
- Support to the Conduct of Nuclear Warfare,
- The Shuttle,
- Covert Action,
- Support to the Operating Forces, and
- Staffing Levels.

The OMB working level -- Arnie Donahue and the CIA Program Monitor, Keith Hall -- are in contact with us to get information for these papers. (S)

2. CIA is most directly involved with studies on Human Source Collection, Production, and Covert Action. The issues in collection are:

- What are the options for augmenting Human Source Collection?
- What "core" level of collection should be assigned to areas of the world which are not now important? (S)

3. In Production the issues are:

- To what degree should there be more competitive analysis?
- Is there a core level of analysis similar to that described above for collection?
- How should intelligence support to the Rapid Deployment Force be structured (a DIA issue)?
